**DETAILED ACTION**

1. Claims 1, 4-6, 8-21, and 24 are pending in the application.

***Claim Rejections - 35 USC § 112***

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 1, 4-6, 8-21, and 24 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

In claim 1, line 3, the phrase "thermochromic water-based ink" appears to be new matter. While the specification discloses the use of thermochromic inks, it does not appear to disclose the use of *water-based* thermochromic inks. If Applicant can locate disclosure of this limitation in the specification, then he should state the location on the record and the rejection will be withdrawn.

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Art Unit: 1762

5. Claim 8 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 8 is vague and indefinite because it depends from a canceled claim -- claim 7. For the purpose of examination, claim 8 has been interpreted as being dependent upon claims 5 or 6, the claims on which claim 7 was dependent.

***Allowable Subject Matter***

6. The preliminary amendment and the 37 CFR 1.132 Declarations of Alan Jones, Shinel Bhagi, and Charles Boyce filed April 18, 2003 have been considered. The Examiner notes that the arguments supplied in the preliminary amendment, in the Declarations, and in the personal interview of January 13, 2003 are convincing that there is a difference between thermochromic inks and thermochromic paints, and that the prior art does not teach or fairly suggest a method of *spraying a water-based thermochromic ink* in a first coating material directly onto a tableware article, in combination with a step of applying a second transparent, dishwasher-proof coating material over the first coating.

***Conclusion***

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The prior art references considered in parent application 09/194,714 and submitted as attachments to the preliminary amendment filed on April 18, 2003 have been cited on the attached PTO-892.
